A NOVEL METHOD OF TREATING VASOMOTOR SYMPTOMS

ABSTRACT OF THE DISCLOSURE

[0077] The present invention relates to the use of compounds and composition of compounds that modulate norepinephrine levels for the treatment of vasomotor symptoms such as thermoregulatory disorders. Furthermore, the present invention relates to the use of compounds and compositions of compounds having norepinephrine reuptake inhibitor (NRI) activity alone or norepinephrine reuptake inhibitor and serotonin reuptake inhibitor (NRI/SRI) dual activity in combination with 5-HT_{2a} receptor antagonist activity.
